COLLEGE PAPERS.

cerning Them.

and West. There are now about a score of col-

satisfactory. The rocks of the classical meta-

paper must not be made purely a vehicle for of-

ficial notices, and, on the other, it must not be

that it be used on the following day? Very few

pendent and aggressive policy" have had long or

the college dailies now partake of an official

character, and still others are only nominally

independent of control by the institution where

they are published. This is not due so much to

the naturally grasping, unreasonable and tyran-nical disposition of college authorities in general

as to the fact that co-operative management or

control by the subscribers has usually failed,

and that practical-minded professors and in-

structors have been among the men best quali-

fied to keep such a concern on a sound basis. Nevertheless, it may be questioned whether selec-

tion and out-and-out control of the editorial

staff by the English department is the best way

of settling things. It may very likely secure

better set of writers for the paper, 'or at least

give aspirants a fairer chance in competition for

the sheet even a suggestion of classroom methods

LOCAL WHOLESALE TRADE

GOOD VOLUME OF BUSINESS FOR THE DULL SEASON OF THE YEAR.

Prices in Good Shape, Except for Break in Butter, Eggs and Poultry-Grain Markets More Active.

The week ended Saturday was one in which real summer duliness prevails in several lines of trade. This includes the dry goods houses, the confectioners, the oot and shoe merchants, the milliners, leather dealers and iron and hardware stores. In each of these lines, however, as much business has been done as expected at this season of the year, July always being a dull month in these lines. Commission row trade was active. The supply of fruits and vegetables is ample to meet the demand, but the surplus is not sufficient to create much loss in any branch of the trade. New Irish potatoes are in good supply and moving well. Old stock is off the New cabbage, new onions, new in fact, everything in that line, are very abundant. Lemons advanced sharply during the week and the advance was well maintained as consumption is large. Taken as a whole, commission merchants speak of the business of the week as being very satisfactory and on most of the products sold good prices were realized. The produce market had an off week. Prices broke badly, poultry, eggs and butter selling at lower figures than a week ago. Whether the lowest notch has been touched is not certain. Cheese is good property at present prices. A considerable percentage of the arrival of eggs are poor stock and after going through the candling process the number is greatly reduced and mackers would rather pay 14 cents for fresh exxs than to handle them as they run at present prices. The hide market continues steady and fairly active. The tendency to lower prices apparently has passed over. Leather, so far as prices are concerned, rules steady and hrm. Flour continues steady at unchanged prices, but it requires considerable manipulation to maintain present figures with the improved reports regarding the new wheat crop. It will be ome time before the new wheat crop will be available for general use for flour and present prices are likely to prevail. Travelng salesmen who came in on Friday and Saturday report the outlook for trade as good for this season of the year.

Indianapolis Grain Market.

Receipts during last week were the largest of any week for several months. There were and receipts of old corn showed some in-Bidding on 'Change was spirited and a good deal of interest was shown in ceretrack bids as reported by the secretary of the Board of Trade, ruling as follows:

"SIR" AND "MA'AM." Good Old Words Whose Use Fashion Now Frowns Upon.

So, when you meet a person who interlards his or her remarks with these expressions of deference, rest assured that that person is a social greenhorn, who should be received sparingly, it ot absolutely barred. The country at large was first reminded of the

She never added 'sir' to them, and her tone was The more "knowing" journals promptly claimed this episode as an evidence of the child's good training and pointed out that "sir" and 'ma'am' are now obsolete in the best society. "No doubt." says the New York Commercia some of the court officials and attendants and a majority of the throng present regarded the omission of the word as due to the child's lack of courtesy, or perhaps to her ignorance of that a long-exploded notion. The same paper quotes from a certain "matro

"It hasn't for a score of years been good form for children to say 'sir' and 'ma'am' to their parents or elders. I was taught to, and did it almost up to the time I was married. When his two cousins were on here from Indiana last summer my Jack nearly had a fit every time they used the words-sometimes I had to laugh myself, especially when they said 'yes, ma'am, to the seamstress. I'm told that in some parts of New England and out West the absurdity is still taught in the public schools, and that failure

course. Most of our readers, no doubt, are already aware that these words have been "called in." For ourselves, we had noticed that they were falling into disuse, but did not learn until re cently that they had been positively forbidden. At the risk of being termed "delightfully vincial," we must confess that we like the good old custom, and can see no harm in the alleged obsolete words. But this is a world of change. The polite

forms of one generation become the absurdities of the next. A century ago a young man writing a love letter addressed his fiancee as "respected Miss." To-day he begins either with something like "Dear Old Girl," or, more frequently, with no salutation at all. Yesterday people in good society said, "Yes, ma'am."
"No, sir." To-day they are instructed to say simply yes and no. To-morrow they will say

New York Mail and Express. tion of the drama lies in the willingness of the actor to submerge his personality in the full flood of the art. She talked about this at the meeting of the Womau's Auxiliary of the National Art Theater Society in College Hall, in East Fifty-eighth succeed," she said, "we must reform ourselves-must conquer the common insatia-

nicious, and we shall not have the highclass play for which we are all looking so "Our task lies wholly in the direction of lessened personality, and if we will con-sent to this I predict that in less than five years we shall have a national art theater

GOOD FEELING IN WHEAT

HALF A CENT ADDED TO THE PRICE ON A GOOD DEMAND.

Report, and Oats Are Lower-Provisions Also Are Down.

CHICAGO, July 11 .- A continued bullish sentiment pervaded the wheat pit to-day, and prices showed a good advance, September closing 1/2c higher. Corn was off 1/4@1/4c. Oats were down \%@\c. Provisions closed from a shade to 20c lower. Cables and weather conditions were rather

disappointing to the bulls, and there was considerable wheat for sale by local traders at the opening, which resulted in an easier feeeling. Opening sales of September were 1/401/20 lower at 781/40787/20, but the price quickly railied to 791/4c to 791/4c on an active commission house demand. Although the crop report was considered somewhat bullish it showed more favorable prospects than had been anticipated by many traders, but reports from the Southwest were still disappointing in the amount of the yield, and this fact contributed mainly to the strength. The advance at St. Louis was also a bull factor. Temporary declines were experienced at various stages of the trade, but each decline was met by additional buying orders, and the market was not slow in responding to the demand. Trading was active the latter part of the session, and the close was strong, with September 4c higher at 791/2c, after selling up to 795/3c. Clearances of wheat and flour were equal to 178,000 bu. Primary receipts were 332,000 bu, against 480,000 a year ago. Minneapolis and Duluth reported receipts of 191 cars, which, with local receipts of 14 cars-two of contract grade-made a total of 205 cars, against 341

The government report had a depressing influence on the corn market at the opening and initial sales on September were 14@%c to 34@%c lower, at 51c to 51%c. The favorable weather and easier cables also added to the depression. There was general selling at the outset by commission houses, but a good support developed on the decline and much of the early loss was regained. The market was quite steady the last half of the session. After selling between 51c and 51%c, September closed 16@ 4c lower at 51%c. Receipts were 299 cars, 26 of contract grade.

Oats ruled easier on a rather bearish government crop report and in sympathy with corn. Trading was dull and featureless and fluctuations in prices were confined within narrow limits. After selling between 34%c and 35c, September closed 1/40 4c lower at 34%c. Receipts were 173 cars. Provisions were firm early on light receipts of hogs and higher prices at the yards. There was buying by brokers at the start, supposed to have been for the account of packers, but selling of pork and ribs caused a reaction. September pork closed 20c lower at \$14.75, lard a shade lower at \$7.85, and ribs off 21/2c at \$8.55. Estimated receipts for Monday: Wheat 60 cars; corn, 400; oats, 190; hogs, 33,000

-Representative Sales .-Dk. .156 ** **

Sheep-Receipts light; shipments none. The receipts of sheep and lambs this week show an

compared with the same week a year ago and a decrease of 2,600 compared with the correspond ing week two years ago. Thus far this year the receipts are a little over 2,700 smaller than the same period last year, and the receipts for the month thus far are less than 500 smaller than

the same period a year ago.

At the beginning of this week shippers were practically alone in the market, and they succeeded in filling their orders at lower prices. In practically all cases sales were 25c lower than the close of last week. About the middle of the week there was a further reduction, but toward the close of the week, with quite an improvement in the demand from local butchers, the market railied some and closing prices were not to exceed 25c lower than the close of last week. The demand has been the best for lambs, and they have, therefore, shown the most strength in the market. At the extreme close of the week all of the best lambs were selling around \$5.50, while the top price for sheep was practically \$3.50. Extra good yearlings would robably sell at \$5.75@4, but it is only a question of a short time until they are worth no more than old sheep. At the beginning of the week it was a little difficult to make clearances at current prices, but at the close of the week the offerings changed hands promptly and, no doubt, more could have been sold. The top prices paid and \$3.60 for sheet

The receipts to-day were small, and, as usual on Saturday, the demand was not urgent. was a place for all the supply, however, at fully steady prices compared with yesterday. Lambs sold at \$5@5.50 and yearlings as high as \$4. Quo

Spring lambs Good to choice yearlings 3.75@4.00 Fair to medium sheep..... Culls and common sheep...... 2.00@2.50 Bucks, per 100 lbs.

MAKING WAR DEADLIER. Illuminated Shell Under Test Here

and Abroad. Harper's Weekly. new and important function has been added to the already deadly shell-visibility of its flight at night. By means of a torch attached to the base of the shell it is possible to watch it throughout its entire course, and to see clearly the exact point at which it strikes. With the automatic guns now fast coming into general use and firing one-pounder shells at the rate of four shots a second, a practically continuous stream of fire is thrown, which can be directed like water from a hose, without

using the sights of the gun and without knowing the range. The illuminated shell was invented and developed by J. B. Semple, of Pittsburg, Pa., who owns all of the patents, and it has been taken up for extensive tests by both the army and navy of the United States, as well as those of England, Germany and

France. Although much of practical value was learned from the naval battles of the Spanish war, there was no opportunity to prove the effectiveness of the modern torpedo boat in the hands of daring and competent men. In repelling attacks of these fleet little vessels it is easy to imagine how difficult is the work of the gunner when suddenly the searchlight of the battleship "picks up" an incoming torpedo boat, where but a moment before the sea was blank. There is no time to find the range or elevate the sights. The swiftly moving destroyer must be hit, and hit hard, before it reaches the 800-yard mark, where it will discharge its first eighteen-inch White-

The time allowed the gunner in which to strike some vital part is a little over one minute. Behind him are the lives of 600 men, his own life, a \$4,000,000 battleship and the cause for which he is fighting; in front is the desperate destroyer, certain of accomplishing its end unless stopped before it gets too close. The knowledge of the result if he fails, the short time, the suddenness with which

he is called into action, all tend to make his work extremely difficult. The combined attack of several destroyers at once would, under present conditions, prove almost impossible to resist. It is for these emergencies, when accuracy and extreme rapidity of fire are demanded, that the illuminated shell is expected to be most effective. Exhaustive tests by the army have shown that by its aid field batteries can go into action at night without any previous knowledge of the range, and that it promotes the effectiveness of fire from coast artillery by showing the exact trajectory of the shell, the drift by the wind, and the amount of 'lead' necessary to strike a swiftly moving vessel at long range. Without the data gained by watching the flight of the first shell the corrections for wind and speed of a moving target would be largely a matter of guess, and while the range can be correctly given and the sights accurately set,

Emperor Not a Spellbinder. London Spectator.

it still requires uniform velocity of the shell

for accurate work.

The greatest effect of the German elections must be upon the position of the Emperor himself. It must reveal, in part at least, to William II, as it reveals to the rest of the world, that his charm and the charm of his ideas for his own subjects are less than had been imagined. He has discoursed to them of his divine right, and has been rewarded often with applause; but the applause has never been quite sincere.

The Emperor has in effect been saying for five years, "I am the state," and a third of his people now answer, "The state is not to our liking." It is quite possiblefor the Emperor is able, though he usually learns only from the thoughts which arise in his own mind-that he may benefit by the rough lesson, and reflect less on his grandfather's and more on his father's

Think what the general vote would have been had the Emperor Frederick been reigning till to-day and had asked from his people formal approval of his policy. Herr Bebel, at least, would have led no party, and the crown would have carried its measures by acclaim, instead of by little bargains with groups on whose objects, as in the Agrarian case and the case of the and those of them who have taken Center, it secretly looks askance. If, however, the Emperor has not learned | joy or peace with their money and services

the month thus far there is a gain of over 800 To the salesman and owner the market this week it has been more or less difficult to sell all kinds of cattle, and the slow and limited outlet, rather than any great change in prices, has been the source of trouble. The receipts were

A very small percentage of the arrivals, however, were fully up to the requirements of buyweather, no doubt, affected the meat trade of local houses, which, of course, reduced their requirements for live stock. Consequently they were wanting only such cattle as were required for immediate use, and they were, therefore, very slow and particular in making their selections. From the beginning of the week there was practically no country demand for stockers or feeding cattle, and, therefore, professional buyers were less industrious and the supply accumulated from day to day. About the only catdays of the week were the handy-weight cows, heifers and steers of good quality and dry fed, and the competition for these was not strong enough to permit any advance in values. Under the circumstances salesmen were unable to get what they considered the market value for their consignments, and, with the conditions improving elsewhere, prices here finally became attractive to outside buyers, and at the extreme close of the week there was quite a good shipalmost a week. Notwithstanding the dull trade and poor outlet this week, salesmen did not besteady prices compared with those prevailing at the beginning of the week, on all cattle that they been sold earlier in the week. In a general way, however, the good stock sold around 25c lower than the high time last week, and com-

with the corresponding week two years ago. Thus far this year the receipts are over 100,000 larger than the same time last year, and for the month thus far there is a gain of over 29,000 compared with the same period a year ago. For the week ending yesterday the leading local packers bought a total of 31,126, against 21,083 the preceding week and 11,412 the same week a 11,518, against 7,607 the preceding week and 12,375 the corresponding week a year ago. The old saying, "Ail signs fall in dry weather," was exemplified in the hog market this week. The receipts have been far beyond expectations ud considerably above the season's average. Because of the liberal supplies it was naturally expected that prices would be lower, but the ide sources, notwithstanding the unfavorable day thus far this year, and the week's receipts week ending yesterday the average number of hogs purchased each day by packers was about 5,200, and shippers sent out an average of over 1,300 per day. At the beginning of the week, notwithstanding the receipts were unusually arge, all buyers were liberal operators at reduced prices, and it was evident that they expected smaller receipts and a corresponding rally n prices. To the contrary, however, the refinally being forced to take more hogs than they supply, and, with packers overstocked, they were indifferent and forced salesmen to accept tory. A feature of the market this week has ng comparatively few common and rough hogs bacon hogs has kept that class at a premium wider spread in values than for some time past. There was a decline in prices every day in the week, except Thursday and Saturday, and twice during the week the decline amounted from 15c lower than the close of last week, and the average prices are in the lowest position they have been since the middle of November and possibly The receipts to-day, of course, were considerably larger than a week ago, which was a holany source, and the situation was not very encouraging to salesmen. Later, however, when nackers came into the field, they were being asked to pay at least steady prices compared with yesterday and, in fact, salesmen rather expected a little advance. It was soon evident, however, that practically no support from ship-pers could be expected, and finally salesmen accepted packers' offers to pay yesterday's closing prices, and the market became as active as one buyer could make. They were taking all weights at the lowest prices of yesterday, and, although they complained of having more hogs than they needed, they anally took all the supply and the market closed steady at opening prices Rough packers to good light hogs sold from \$5.2

lions in their past history, but they are not making them now. A Personal University.

New York Evening Post. In assuming the presidency of the board of trustees Mrs. Stanford merely emphasizes the proprietary character of the Stanford University, which was already pretty thoroughly understood. In fact, there is probably a gain in having the form of the university government agree with the reality. If, as the dispatches assert, the power of appointing professors is to be taken from President Jordan and given to the trustees, his position becomes that of chief employe, and it would be much more candid to dub him head clerk or acting manager of the corporation. Mrs. Stanford is within her rights in managing in her own way the university she has create That she is wise many will doubt. Founders generally have been content to leave the control of educational gifts to experts other course have very rarely assured lo
